

## Camera

0.5 space 24pin FPC Socket

## The pin output sequence

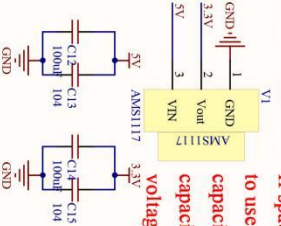

<sup>c</sup> is customized by customers  
USB

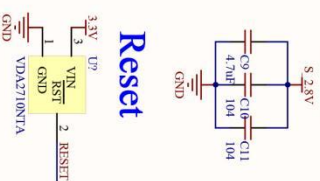

## Main power 5V to 3.3V

Advised to select a power chip with the rated output current greater than 150ma.

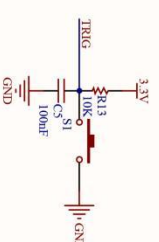

If space permits, advised to use at least one large-capacity electrolytic capacitor to stabilize the voltage.

## Camera Power

## Buton

## GM802 Simple Reference Circuit
